

CHARGEVIEW™ 240W DESKTOP CHARGER

SEE EVERY PORT IN REAL TIME

ChargeView™ 240W Desktop Charger is a USB-C GaN charger with a real-time LCD display that brings visible clarity to high-demand setups. Built for creators and professionals, it helps power multiple devices at once while showing live wattage by port. Its dual-orientation design, compact footprint, and premium finish make it feel at home beside modern hardware.

FEATURES

-  Real-Time Power Display
-  240W Multi-Device Charging
-  6× USB-C Port Design
-  Advanced Fast Charging
(AVS + PPS)
-  Dual-Orientation Stand
- GaN** GaN Technology
-  Smart Power Distribution

KEY HIGHLIGHTS

SEE LIVE POWER OUTPUT

The integrated LCD shows real-time wattage for each port. Users can quickly verify charging activity and understand how power is distributed across connected devices.

ADAPTIVE FAST CHARGING LOGIC

Ports C1 and C2 are optimized for fast charging with newer iPhone models using PD 3.2 AVS. Ports C3 through C6 deliver PPS fast charging for compatible Samsung Galaxy and Google Pixel devices, helping them reach optimal speeds safely and efficiently.

COOL AND QUIET PERFORMANCE

GaN architecture supports efficient charging in a compact body with fanless operation. It is designed for sustained desktop use without adding noise to the workspace.

BUILT FOR HIGH-DEMAND DESKS

With up to 240W total output across six USB-C ports, it is designed for setups that include laptops, tablets, phones, and accessories at the same time. It helps reduce charger clutter while keeping the desk more organized.

FLEXIBLE DESKTOP PLACEMENT

The included stand supports both vertical and horizontal orientation. Users can choose the layout that best fits their cable flow, reach, and desk footprint.

PROTECTION YOU CAN TRUST

Built-in safeguards monitor overcurrent, overvoltage, and temperature conditions. This helps provide everyday confidence when charging multiple connected devices.
